

MAKE ORAL HEALTH A PRIORITY

With Cigna Dental Care (DHMO¹)

Prevention can be the key to a healthy smile. Routine care from your dentist can help find problems early. Before you need more advanced – and more costly – care.

Healthy gums, healthy you

Gum disease is a bacterial infection of the gums and bone around your teeth. And certain factors like smoking, poor oral hygiene, diabetes and stress could increase your risk of developing this disease.²

Too often, people don't know they have gum disease. It's usually painless in the early stages. And it shows few or no obvious signs.

The good news is that gum disease is preventable and treatable. The American Dental Association (ADA) suggests you:³

- › Brush your teeth twice a day with a soft bristle toothbrush
- › Floss daily
- › Eat a healthy diet and limit snacks between meals
- › See your dentist regularly

Prevention is built into your Cigna Dental Care plan

Your Cigna Dental Care plan covers certain preventive care services at low or no extra cost to you. It's designed to help you have a healthy smile.

These services include:*

- › Oral exams
- › Cleanings
- › Fluoride treatments
- › X-rays
- › Oral cancer screenings
- › And more

* Exams, cleanings and fluoride treatments are limited to two per calendar year. Full mouth and panorex x-rays are limited to one every three calendar years. Panorex: One every three calendar years. The frequency limitations of certain other covered services are set forth on your Patient Charge Schedule.

Feel better about your smile

Smile wider knowing that your Cigna Dental Care plan can help with coverage for:

- › Teeth whitening – Using take home gel trays customized to fit your mouth*

* Only the use of take-home bleaching trays is covered. Other types of bleaching methods are not covered.

Are you at risk?

Check out Cigna's online assessment tools. They can help you identify your risk for gum disease and cavities. You can find both assessments at **Cigna.com** and **myCigna.com**. Simply type "gum disease risk" or "cavity risk" in the search box.

Protect your smile

If you don't wear mouth protection while playing sports, you're more likely to harm your mouth and teeth.⁴ But you can avoid extra trips to the dentist. Prevent costly repairs to your mouth, teeth and jaw by wearing a mouth guard. Your Cigna Dental Care plan can help.*

* Benefits for the replacement of a mouth guard may be limited to one per any 24 consecutive month period.

Together, all the way.®

Offered by: Cigna Health and Life Insurance Company, Connecticut General Life Insurance Company or their affiliates.

The Cigna Dental Oral Health Integration Program®

This program offers enhanced dental coverage for customers with these medical conditions:

- › Diabetes
- › Heart disease
